CSS	Cpp
JAVASCRIPT	

EDUCATION

B-Tech Cse (Artificial Intelligence)   **2023-2027**

2nd year undergrad
MIT ADT, School of Computing, Pune-412201

PROJECTS

• Amazon Clone
  Built a pixel-perfect frontend clone of the Amazon homepage using HTML, CSS, and JavaScript. Features a responsive design, custom navigation bar, product cards, and a modular layout. Deployed on GitHub Pages.

• Expense Tracker
  Developed a dynamic web application to track income and expenses. Implemented localStorage for persistent data, real-time balance updates, and a modern glassmorphism-based UI using HTML, CSS, and JavaScript.

• JavaScript Quiz App
  Created an interactive quiz app with multiple-choice questions, score tracking, and feedback on answers. Designed with responsive styling and dynamic question rendering through JavaScript.

• Netflix Clone
  Designed a static frontend clone of the Netflix homepage, featuring horizontal scrollable sections for categories like Trending and Originals. Styled using HTML, CSS, and basic JavaScript for layout interactivity.

• Campus Connect UI
  Prototyped a student community portal interface showcasing announcements, posts, and events. Built using HTML, CSS, and JavaScript to simulate a university social hub frontend.
